## ABSTRAK

Pembangunan landskap bagi kawasan resot persisiran pantai memfokuskan kepada pembangunan bersepadu di negara ini. Secara globalnya pembangunan persisiran pantai yang bersepadu amat popular di masa kini kerana ianya membawa pulangan besar kepada pengusaha-pengusaha tempatan. Di samping itu, ianya juga membantu secara tidak langsung membangunkan kawasan sekitarnya.

Pembangunan Resort Pantai Bersepadu adalah untuk menyediakan suatu kawasan tempat tinggal serta tempat bekerja yang eksklusif dan terjamin kualitinya. Namun tanpa penerapan aspek rekreasi, pembangunan mampan tidak akan tercapai kerana ianya tidak seimbang.

Menerusi penekanan baru dalam rekabentuk kawasan persisiran pantai ianya dijangka dapat membuka mata masyarakat tentang perspektif baru mengenai pantai dan juga penggunaan alternative pantai yang bukan sahaja tertumpu kepada kegiatan riadah tetapi ianya juga sebagai tempat untuk menimba ilmu, berinteraksi, bertukar pendapat, bermeditasi dan sebagainya. Perkara sebegini perlu ditegaskan supaya masyarakat akan datang berupaya untuk memahami dan menerima kaedah pembangunan bersepadu ini.

## ABSTRACT

The landscape design for beach resort development in this country of Malaysia basically focus on the integrated development. In global, the integrated coastal development is famous in most of developing countries because it is a good investment and give a very big returns in economics especially to those local developers and also indirectly help to develop the surroundings and uplifted the living status of others.

The integrated beach resort also aimed to provide a good and exclusive living environment as well as good quality working environment. But without implementing the recreational aspect in any development, the sustainability of the development can hardly be achieved.

Therefore, with the new approach on the design of the integrated beach resort in this country could help to open up the new perception of beaches and also to understand the possible alternatives of the uses of beaches which is not just focus on recreational area but also as a place to gain knowledge, to interact or to meditate and other wise. This matter need to be address clearly as for the new generation could understand the approach of this new integrated development.
