ABSTRACT

As an overall, development of an institution didn't only take count of the indoor aspect, but it need to relate with its outdoor spaces too. The outdoor space has become an informal learning space for its user. It also gives impact of input receiving depends on individually.

The outdoor space is one of the factors that support development of students' minds. It is where, what have been observe and analyze, met, experienced and discussed. The outdoor spaces also become an inspiration to students where they fresh their mind, energy and spirituality.

This research will explore further the usage of learning spaces aspects as a whole where it consider the users, programs that being cater for them, functions of the buildings and physical environment aspect of the institute. From the research outcome, it will become as a base towards generating a campus that has quality outdoor spaces and more energetic.
